

PAINTBALL

Urban Warfare Training

Bagira Systems Ltd. offers a full training package tailored to the needs and requirements of our customers. We provide professional teams for training and field support, special equipment and weapons, mobile units equipped with all the necessary gear to enable training in remote locations, and modular buildings. We come up with comprehensive, personalized solutions for each and every customer.

Bagira's force-on-force Paintball training is considered to be the most effective and realistic urban warfare practice tool. The training can be carried out in almost any setting or location, indoor or outdoor, and is favored by special forces.

Bagira supports the troops in deployed areas. With our specially designed simulated weapons and mobile units, we reach hundreds of soldiers in the field on a daily base, easing logistics and saving ammunition expenses.

Bagira provides a full Paintball training package to infantry and special forces.

Capabilities

- Full Training Package
